

Dock Lift Efficiency

Speed-Lift / Energy Savings & Environmentally Responsible

Speed-Lift dock lifts offer high-grade environment friendly benefits rarely seen in the material handling industry.

Superior Handling Equipment's Speed-Lift dock lift only requires electricity when raising the platform and returns to the ground with gravitational force – resulting in **significant energy savings**. **Speed-Lift** durability is also top-of-the-line; produced with high grade steel, cylinders, and electrical components.

You'll immediately notice the **efficiency benefits** that **Speed-Lift** adds to shipping and receiving operations. **Vehicle congestion reduction, increase in product movement rate**, as well as **efficient energy consumption** are a few of the performance benefits to utilizing **Speed-Lift dock lifts**.

Speed-Lift's design also offers more **environmentally responsible** benefits.

Speed-Lift dock lifts require no in ground pits, eliminating undetected oil leaks, ground water contamination, and collection areas for other liquids or solid debris.
