

# Dock Lift Productivity

## Speed-Lift / Efficient Performance & Productivity Booster

**Superior Handling Equipment** builds **Speed-Lift dock lifts** to make shipping and receiving bottlenecks a thing of the past.

Raising the platform to a truck height of 50 inches at an average time of 10 seconds increases efficiency up to 50 percent when compared to most scissor lifts. Trailers can be off-loaded within 45 minutes. Lift controls can be operated from the platform, the truck, or the dock.

**Speed-Lift dock lifts** can reach 100 percent of their full capacity load requirement without adjustment, while most scissor lifts require centering in order to lift to full capacity. On average, most scissor lifts can only raise 50 to 60 percent of their full capacity.

Watch overall morale and productivity increase in any work environment by enhancing performance with **Speed-Lift dock lifts**.
